

# PROCESS DIAGRAMS

Diagram Type	Definition	Example
Basic flowchart	A flow chart shows the step-by-step actions that are taken in any specific procedure or process by means of using basic geometric shapes and connecting lines.	
Storyboard	A storyboard uses images or illustrations in sequence to visualize the stages of a procedure, process, or story.	
Cycle	A cycle diagram depicts how items are related to one another in a repeating cycle with no beginning and no end.	
Play diagram	A play diagram is used mainly in sports. Players are represented on a playing court or field with a series of symbols (X and O). Arrows and lines depict motion or movement so players can visualize their relation to other players and their relation to a specific location on the field.
